

TREKKING IN AYDIN

Karabağlar Canyon

Karabağlar Canyon is an aquatic canyon with a length of 2.5 km. It joins with the Görle Canyon in the Lower Görle Village. The canyon entrance is located on the road between Karacasu Karabağlar village and Aşağı Görle Village and its water flows into Kemer Dam Pond

It is possible to observe the canyon from the village road. There is a 200-meter altitude difference between start and finish.

Initially, the depth reaches 50 m. It narrows the width to a place where a person can pass. There are 3 waterfalls in the canyon that require rope descent.

The places suitable for trekking in the province are the region starting from **Dilek Peninsula**, continuing in **Karina** and extending to **Büyük Menderes River** and **Bafa Lake**
